

## **Mini Book**

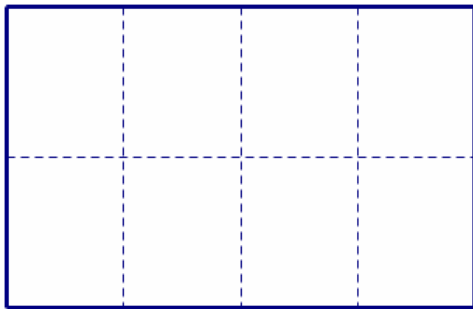

### **Materials:**

One sheet of paper

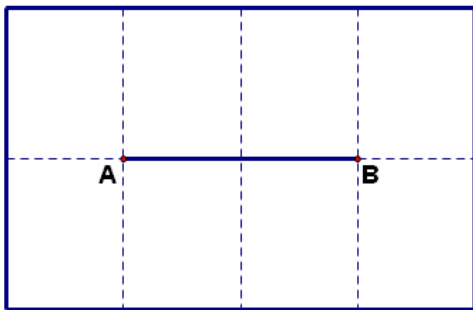

Scissors

### **Instructions:**

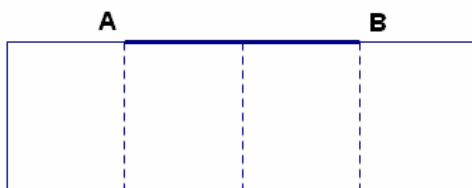

1. Fold paper lengthwise once. Unfold then fold twice crosswise so that when the paper is unfolded, there are eight equal sections.

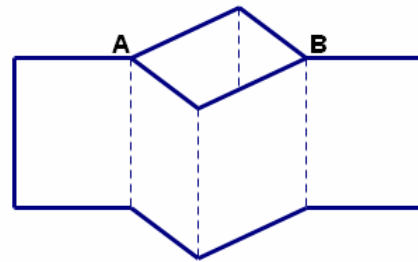

2. Carefully cut from A to B

3. Refold lengthwise so that the cut is along the upper edge.

4. Holding the paper at each end, apply gentle pressure so that the cut opens to form a diamond shape.

5. Press the ends together so that A touches B. This forms four double-thickness sections which become the pages of the mini book.
6. Fold all pages to the right to complete the book. Number pages, create a cover title and insert information as appropriate.
